

VENTURE 1

# Cloud Adoption Strategy, Design and Implementation

**Client :** Public Institution (Museum)      **Geography :** London  
**Sector :** Public Sector (Non Profit)      **Size :** 1000 Seats

## Venture 1 identified a new Cloud based Solution for the Public Institution

**The Challenge:** The Museum recently engaged Venture 1 Consulting as a trusted partner to help identify a set of new, 'best fit' cloud-based solutions to resolve some of its key IT and business challenges whilst also leveraging the benefits of innovative cloud technology. Key areas of importance were Email, Remote Working, Mobile Device Management, File and Storage, Backup and Instant Messaging.

**The Solution:** Venture 1 Consulting carried out a forensic discovery exercise to gain a thorough understanding of The Museum's current environment and its detailed business and technical requirements. This enabled Venture 1 to make a series of architectural and technology recommendations and produce technical designs for solutions based in the Cloud, namely:

- Office 365
- One Drive
- Direct Access

**Benefits Derived:** Venture 1 was able to implement and significantly improve and implement a more seamless end user experience for The Museum's staff. Mobile and remote working capabilities are now available, as well as a consolidation of the on-site IT infrastructure.

**Technologies:**

- Office 365
- Exchange
- ADFS
- Direct Access

**Key Activities:**

- Analysis
- Design
- Implementation
- Support
