

VENTURE 1

Federation and Single Sign-On

Client : National Motorcycle Manufacturer **Geography :** Global
Sector : Motorcycle Manufacturing **Size :** 5,000

Venture 1 streamlines sign-on facilities at major Motorcycle Manufacturer

The Challenge: The UK's largest motorcycle manufacturer, with around 900 dealerships, currently use a dealership portal. The Manufacturer was looking to introduce a new CRM system for its dealerships and consolidating log on credentials for both the new CRM system and dealership portal into one set of credentials, using Microsoft ADFS for Single Sign-On.

The Solution: The applications now use a new Active Directory domain in the DMZ as an identity provider.

As experts in ADFS, Venture 1 designed, tested and implemented the solution. Portal users can now log-on with their (new) credentials and access both the portal and the CRM system with one set of credentials. Once users log into one application, they can seamlessly log in to the other without the need to enter their credentials again.

Benefits Derived: Easier interoperability
 One set of credentials required per user
 Streamlined User Access
 Improved Security

Technologies:

- Active Directory
- Federation Services
- Active Directory
- Domain Services

Key Activities:

- Design
- Implementation
- 3rd Party System Intergration
- Configuration & Testing
- Documentation
