

Venture 1 Consulting Windows 10 Deployment

Windows 10 Planning Package

Delivering a stable, supportable and secure desktop to end users is high on most businesses' IT priority list. Yet a Windows 10 deployment can often be a lengthy, complex and expensive exercise. Our Windows 10 Deployment 'Building Blocks' allow customers to take a logical, manageable and fully quantifiable approach to break the back of the problem.

The **Planning Package**, is Step 1 in the process and ensures that customers get started on the right track with identification of their requirements, a full understanding of the technology features and capabilities available to them and a recommended approach to deployment.

Package Goal

To provide customers with a detailed insight into Windows 10 deployment, based on their own specific requirements, followed by a set of deployment recommendations and a summary deployment plan.

Elements Included

- Workshop
- Health Check
- Requirements and Scoping
- Summary Application Assessment
- Recommendations Report
- Upgrade Plan

Suitable for

- Customers that want to deploy Windows 10 as a replacement for an earlier version of operating system.
- Customers that want to achieve a better managed client environment.
- Customers that intend to refresh their Windows client hardware estate.
- Customers that need to more effectively manage their client environment to deploy fixes, patches and compliance and security policies.
- Customers seeking to reduce the amount of time and money they spend managing their client environment.

Benefits

- 1 Gain an understanding of the Microsoft options in Windows desktop delivery and ongoing management.
- 2 Receive recommendations based on your own environment, rather than generic advice.
- 3 Gain a greater appreciation of the challenges in moving to; and benefits of, having a more mature Windows deployment and management environment.
- 4 Benefit from consultants with many years of experience in client deployment and from lessons learned elsewhere.
- 5 Determine your current level of desktop deployment maturity.
- 6 Obtain initial identification of potential application and infrastructure migration issues likely to apply within your own environment.
- 7 Receive a summary plan for the deployment of Windows 10 and its underlying management .

Summary

Venture 1 Consulting has many years' experience in helping customers achieve a fully managed and robust Windows client management environment. We have been asked about, and answered, challenges that make clients compliant and secure, and allow IT to be pro-active and controlled. The result is an environment that costs less to manage and meets business requirements.

This package is the start of that journey.

Schedule

Up to **4 days** consultancy in total.
